

Zxzxxx xz zxxzy!

Zzy xzx yxx zxxz?

Xzx xzx xxzxx; zxxz xz yxxz zxxz?

Can you read that? It's called Zxzz, which is codeword for "Word". There are three variables, and they mean the following:

x = A/E/I/O/U

y = Y

z = B/C/D/F/G/H/J/K/L/M/N/P/Q/R/S/T/V/W/X/Z

So that means,

Zxzxxx xz zxxzy!

Then, there is one more system of variables:

x=0

y=2/4/6/8

z=1/3/5/7/9

So this is a mathematical equation,

$yxzy - zzyy = yz$

This shows one thing,

Zxxzzz xz zxxzz zx zx yz zxxz zxxz!

Use this in any system, as the only things that were given variables are numbers and letters, because all punctuation, capitalization, and spacing remain the same!

Zxx yx zxxz, xzxzxzxz!
